NEWS RELEASE

For Immediate Release

Stewart EFI, LLC Hires Plant Manager for Stewart EFI Finishing of El Paso, Texas

El Paso, TX – November 29, 2010 – Stewart EFI, LLC is pleased to announce that Mr. Ly Nguyen has joined the organization as Plant Manager of Stewart EFI Finishing, LLC in El Paso, Texas.

Prior to joining Stewart EFI, Mr. Nguyen held management and engineering positions at CCR Technologies, Stanley Works, Robinson Nugent, Thomas & Betts, and Hitachi Chemicals. He has extensive experience in manufacturing management, plating, process control, and environmental practices.

Mr. Nguyen has a Bachelors degree in Chemical Engineering from the University of Illinois, and an MBA from the University of Dallas.

“We view the addition of Mr. Nguyen to our team as another positive step in supporting the many customers serviced by Stewart EFI’s El Paso metal stamping and plating facilities”, according to Armando Hernandez, Stewart EFI’s General Manager of El Paso Operations.

Stewart EFI, with over 200 employees, also has operations in Thomaston, CT and ranks among the largest suppliers of small precision metal stampings in the world. Its capabilities include deep drawn, progressive die and slide-formed metal stampings, wire forms and automated and secondary assembly as well as metal plating and finishing. The company’s primary markets include automotive, electrical, electronics, consumer, industrial, defense and medical. Stewart EFI’s products are sold worldwide.
